# PROTOCOL USER GUIDANCE

## TABLE OF CONTENTS

# PROTOCOL USER GUIDANCE

As a community oriented project, anyone and everyone is invited to take part in the Quiver world. Find out what role fits your skills, monetize them for you and the communities' mutual benefit.

## INFORMATION COLLECTORS

So you like collecting information, but you don't know what to do with it and earn from it. Collected information can be very valuable when used at the right place and at the right time. Make use of the information, provide it to the community. Information like an upcoming presale of a promising project, a project that has started and is about to explode price wise, a good entry for a trade etc. are valuable for investors looking for a good ROI. If you are one, check what is in store for you.

### Requirements and Responsibilities:

- To gather correct information, you have to be knowledgeable and have a wide area to reach out for information gathering.

- As an information provider, they are responsible for providing valuable information in time in a specific form for the community and their benefit.

- Make sure that the provided information is secure and trustworthy.

- Information provided is factual and not a hearsay.

### Benefits and Profits:

- Valuable information provided in the Quiver Protocol can only be accessed by users who pay the fee. As an information provider, they will get a percentage from this fee.

- NFT ownership for the information provided

- Steady income stream from users who purchase the information for their own use.

- In exchange for the information they have provided, they will be awarded a QREP token. QREP tokens can be used to claim rewards,

- In the early stages, they will benefit from a high multiplier on their reputation gains.

- As an early bird information provider, they will earn more benefits for their loyalty.

## INFORMATION VERIFIERS

Information provided in the protocol should be vetted and verified, and here is where the role of verifier comes in.
**INFORMATION VERIFIERS** are the people who have gained high reputation points. They are responsible for verifying the authenticity of the data provided by the Information Collectors. Verifiers are elected by governance.

### Requirements and Responsibilities:

- First and foremost they need to have the required reputation points to be able to apply to this position,

- As an information verifier, they have to be knowledgeable, smart and have a wide area of expertise.

- They need to have a keen sense to prove the authenticity of the information provided by the Information providers.

- Have a good ability to research about the information provided by the Information Collectors.

- Know the common rules in verifying information like being discreet and respectful of others' privacy information.

- Responsible enough to keep the animosity of verified information.

- Should not use the verified information for their own benefits.

### Benefits and Profits:

- QREP tokens for their effort and rewards from QREP token ownership

- Regular salary from the protocol.

## INFORMATION PURCHASERS

Information provided and vetted in the Quiver Protocol can be purchased. If you are a self-investor or a part of a small group of investors who is looking for good investment, then you can purchase information from the Protocol and be part of the Information Purchasers.

### Requirements and Responsibilities:

- Should know the risks involved and invest depending on your risk appetite.

- Provide feedback on information if price is not set properly or it's not profitable.

- Vote and vouch on the validity of the project.

- Have capital to purchase information and investment on your chosen project.

- Responsible for non-disclosure of privacy of information with 3rd parties but only use said information for self-investment.

### Benefits and Profits:

- Get profit from the qualified investments.

- In the early stages, Information Purchasers can benefit from being able to buy information at a lower price.

- Discounts are available for bulk purchasers.

## INVESTORS ON QUIVER

They are the bloodline of the project. They will allocate capital for Quiver Protocol with the expectation of future financial return or to gain an advantage – they are QSTK purchasers.

### Requirements and Responsibilities until Public Sale from now:

- Know where invested funds are spent.

- Know the lock period of investment

- Willing to support development of Quiver Protocol.

- Must have a capital to invest in QSTK.

- Loyal and active in the community.

- Participate in governance actions for Quiver IDAO

- Understand QSTK token's usability

### Requirements and Responsibilities after Public Sale:

- Know the risk of investments.

- Willing to support development of Quiver Protocol.

- Must have a capital to invest in QSTK.

- Loyal and active in the community.

- Aim to increase their portfolio balances as part of Quiver IDAO.

- Participate in governance actions for Quiver IDAO

- Invest capital on the project and focuson its long-term goals.

### Benefits and Profits:

- Profit on protocol rewards from QSTK ownership

- Sales gained from QSTK from seed or at a heavily discounted price.

- Discount on information purchase for QSTK token ownership

## TOP USERS

As an active user who climbs to the top by owning more QREP Tokens among the majority, top users could have power in the protocol voting process and will enjoy more rewards benefits.

### Requirements and Responsibilities:

- Top ranking QREP holder is a requirement.

- With time availability.

- Must be active in the community.

- Can provide valuable information that can benefit the community as a whole.

- Provide more value and contribution to the community.

- Purchase of information. provide assessment and feedback to and from the community.

### Benefits and Profits:

- QREP tokens for the effort and rewards from QREP token ownership

- Bonus USDT rewards for active participation

- Listing on Quiver Protocol website

## ADVISORS

In every endeavour and projects, an advisor is a must. They are the people who have a big role in leading the project on the right path by providing financial or technical advice for the platform's growth. They are not considered as a Foundation Member nor an Internal Team, they are the **Advisors.**

### Requirements and Responsibilities

- Expertise in the field of blockchain technology, finance and investment is a must.
- Keeping informed about the activities of the project and for advising the Foundation Members on the appropriateness and general merits of policies and activities.
- Provide quality advice for protocols growth.
- As privy to conversation of top secret information, non-disclosure of important information is a must.

### Benefits and Profits:

- Profit share with the foundation
- QREP token for the effort and rewards from QREP token ownership
- Token share with the foundation.
- QSTK tokens or rewards for advisorship at specific events.

## PARTNERSHIPS

Quiver's goal is to build a unique, scalable, and secure investment protocol based on community collaboration and performance metrics. We are open for partnerships for entities or people who want to share the same vision with us.

### Requirements and Responsibilities:

- Must have a good standing in the community
- High interest in Quiver Protocol and its development.
- Introduce Quiver to their community
- Increase Quiver protocol's financial traffic
- Can give advice for the project's development.
- Maintain strong and effective partnership.
- Should keep private information secret and not disclose it.
- Continuous support to the community.

### Benefits and Profits:

- Profit from their investment on QSTK
- Profit from discount on information purchase
- Profit from the services we provide
- Get more users from our community.

## PROTOCOL GOVERNANCE MEMBERS

Active Protocol supporters with a high reputation can be elected by a predefined number of members and become a Protocol Governance Member. They will act as representatives for non-governance members and with voting power . If you have the leadership capacity and a high reputation in the community, then we need you.

### Requirements and Responsibilities:

- Should meet the required reputation points.
- Must have a sense of leadership, fair, consistent and with management abilities.
- Must be reliable and not use the position for self gain.
- Positions are filled by the voting process.
- Create and process governance proposals for improvements.
- Manage the DICP, as well as the services built on top of it
- Maintaining the efficiency of the DICP
- Tasked with determining the percentages of profit allocated between foundation members, community members,
- Protocol seed investors, and the development of future Protocol services.
- Responsible for setting the correct pricing of information provision services.

### Benefits and Profits:

- QREP tokens rewards awaits for your effort
- 2x in rewards on QREP ownership from the protocol
- Management experience
- Possibility to be part of Foundation members and get foundation rewards

Go Back

**Quiver Protocol**

Foundation members have a big role and contribution to the construction and development of the Protocol. The building of the initial protocol, Quiver IDAO, its initial service and utilities that is required for whole protocol users is of utmost priority.

### Requirements and Responsibilities:

- High QREP and level of trust from the community is the main requirement.

- With leadership, time management and the ability to decide wisely under stress is essential.

- Manage the internal team members and oversee the things that need to be implemented for the project.

- Can help in marketing, community growth and increasing the number of protocol users and purchasers.

- Build the DICP and Quiver IDAO, among other utilities that serve the entire Protocol.

- Responsible for building the community, governance, and architectures of both the Protocol and IDAO.

- Select the initial developer team and seek seed funding.

- Foundation members reserve the right to make proposals for the IDAO, and every other service that is both beneficial and necessary for the project.

### Benefits and Profits:

- Profit share from successful QSTK sales.

- Profit from protocol rewards

- Token share after public sale

### IDAO GOVERNANCE MEMBERS

Holders of QSTK tokens are eligible for the position. They work differently from Protocol Members and they use different tokens, the QSTK.

### Requirements and Responsibilities:

- This role requires QSTK holdings as the main requirement to qualify for the role

- Time availability is essential.

- Ensure funds are used correctly for initial stage development.

- Actively find opportunities for investment in the information market.

- Make a proposal for investment into DAO.

### Benefits and Profits:

- Discounts on information purchases

- Profit from protocol rewards.

- Profit from the investments managed by DAO.

## INTERNAL TEAM MEMBERS

Every project has internal teams working behind the curtain so to speak. They are the hardworking people who support the Foundation Members for the development of the project such as admin tasks, community growth, sales and marketing.

### Requirements and Responsibilities

- Knowledge and experience in cryptocurrency and blockchain technology is a must.

- Must be efficient, trustworthy, accurate and dependable on their chosen roles.

- Must have good oral and written skills for communication within the team and the community.

- As a selected member of the Foundation member, they need to cooperate with the Foundation Members and the community based on the tasks given.

- On time delivery of assigned tasks is highly appreciated.

### Benefits and Profits:

- Salary for the job.

- QREP tokens for the effort and rewards from QREP token ownership
